TO: Mayor and City Council

FROM: Director of Public Works

SUBJECT: Street Lighting System within Mission Boulevard from Harder Road to Calhoun Street: Approval of Plans and Specifications and Call for Bids

RECOMMENDATION:

It is recommended that the City Council adopt the attach resolution that approves the plans and specifications and calls for bids to be received on December 17, 2002.

BACKGROUND:

On March 19, 2002, the Council passed a resolution establishing the subject Underground District 26, for Mission Boulevard, from Harder Road to Calhoun Street, as shown on the attached map. Since establishment of this undergrounding district will remove the existing utility poles and overhead lines, it will be necessary to install a new street lighting system. Since the new street lighting will be located in the median, it can be completed prior to the start of the undergrounding work by PG&E and the other utility companies.

The design of both the street lighting and undergrounding work has been adjusted to consider the preliminary proposal for the Route 238 Alternative project. With the exception of the portion just south of Harder Road, the Route 238 Alternative project would only result in moving the curb line and narrowing the sidewalk width in this portion of Mission Boulevard. The street lighting in the median of Mission Boulevard will not extend all the way to Harder Road in order to allow for the future relocation of the median that will be associated with the widened portion of Mission Boulevard north of Harder Road.

PG&E is the lead for this particular undergrounding project, and they are in the process of completing their joint trench design and coordination with property owners. Our design consultant, Kimley-Horn and Associates, did the City's street lighting design. Work on this project is being coordinated so that the City's street lighting project will be completed before the utility companies begin their work. PG&E estimates that their undergrounding work will begin September 2003, and will be completed in August 2004.

The Disadvantage Business Enterprise (DBE) goal of 10 percent established for this project includes both Minority Business Enterprise (MBE) and Women Business Enterprise (WBE) participation. The establishment of the goal was based on staff's determination of the subcontracting opportunities available for the work.

PROJECT COST:

The estimated costs for the project are:

Construction Contract Cost	\$210,000
Design and Administration	50,000
Construction Inspection and Survey	40,000
Total	<u>\$300,000</u>

FUNDING:

The 2002-03 Capital Improvement Program Budget includes \$440,000 in the Street Lighting Fund for this project.

SCHEDULE:

Open Bids	December 17, 2002
Award Construction Contract	January 21, 2003
Begin Construction	February 18, 2003
Construction Complete	May 16, 2003
